

Rare Disease Day

Let's rise and fight for Solutions together

At KrabbeConnect we focus on meeting the needs of the Krabbe disease community but every chance we can, we will rise and fight for solutions to improve life for all rare diseases.

February 28th, 2023

Call to Action

- Wear your strips for Rare Disease Day!
- Let's partner, share resources, and foster inclusivity to uncover solutions together.

We can make Solutions Happen

When we all partner on critical issues such as orphan drug legislation, newborn screening, clinical trial criteria, natural history studies, collections of patient-parent perspective, and other topics that impact every rare disease, change is imminent.

Why Care

According to the National Institute of Health, more than **7,000** rare diseases exist yet, less than **10%** have treatable options.

According to Rare Diseases International and EURORDIS, **300 million** people live with a rare disease worldwide.

Build Partnerships

Remember to collaborate. There's strength in numbers - it's more efficient and effective for problem-solving.

Share Resources

Why recreate the wheel? When we all share ideas and resources we all save time and precious funds.

Foster Inclusivity

Encourage others to work together. Differences can enrich experiences, rather than divide us.
